Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 29, 2007 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22, 28-34 and 79 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,549,679 to Kuslich in view of U.S. Patent No. 6,413,536 to Gibson et al.

Kuslich discloses in figure 6 the creation of a cavity in the vertebral bone through an access aperture, and the insertion of a container, which container is described in detail in column 7, lines 1-62. Column 9, lines 55-60 describe the use of bone chips implanted within the bag. Column 7, lines 15-17 disclose additional different implantation materials, e.g. hydroxyapatite. Also described with the filler material are

fluids, which are considered to be the second bone filler. Inherently, the bone chips have a different viscosity and chemical makeup than the hydroxyapatite. The filler is introduced to the cancellous bone as in-growth of bone Occurs.

Response to Arguments

Applicant's arguments filed June 29, 2007 have been fully considered but they are not persuasive. Applicant argues that the '679 Patent is directed towards spinal fusion to treat the disc space and not to treating the vertebral bone itself. Examiner agrees with this statement, however it does not distinctly overcome this art rejection. This patent not only treats the vertebral disc space but also the vertebral bone. Because this treats the vertebral bone in addition to the vertebral disc space the '679 Patent clearly reads on the claim limitations.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Araj whose telephone number is 571-272-5963. The examiner can normally be reached on M-F 8am-5pm.
